

Lawrence T Makhafola

Junior Data Analyst

Pretoria, South Africa | 072 200 8937 | lawrencegivenchy@yahoo.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFILE

Aspiring Data Analyst with a strong foundation in Mathematical Sciences and practical experience in SQL, Excel, and Power BI. Completed multiple end-to-end projects analysing structured datasets to identify trends, evaluate performance, and support business decision-making. Experienced in data cleaning, exploratory analysis, DAX measure development, and building insight-driven dashboards. Focused on developing job-ready analytical skills within the Retail, Financial Services, and Telecommunications sectors.

TECHNICAL SKILLS

- Microsoft Power BI — Dashboards, KPI Cards, Slicers, Page Navigation, DAX Measures
- Advanced Excel — Pivot Tables, XLOOKUP, INDEX/MATCH, Charts, Interactive Dashboards
- Databricks SQL — CTEs, Persistent Views, Window Functions, Joins, Date Functions, Aggregations
- Analytical Logic — KPI Development, Trend Analysis, Customer Segmentation, Revenue & Profitability Analysis
- Documentation — Data Storytelling, GitHub README Documentation, draw.io (ERDs, Flowcharts)

PERSONAL PROJECTS

Nova Retail Group — Sales Performance Analysis | Databricks SQL & Power BI 04/2026

- End-to-End Analysis: Built 15 permanent Databricks SQL views across 4 tiers — basic queries, intermediate joins, advanced window functions, and business intelligence questions — across 2,500 orders spanning 2023 and 2024.
- Dashboard: Developed a 4-page interactive Power BI dashboard with slicers, KPI cards, and navigation covering Sales Overview, Customer & Channel Analysis, Products & Profitability, and Customer Satisfaction.
- Key Findings: Identified 9.63% YoY revenue growth; Electronics drives 74% of R16.88M total revenue; Online channel outperforms Store by 2x; Home Appliances carries the highest profit margin despite being second in revenue.

E-Commerce Sales Funnel Analysis | Databricks SQL & Power BI 02/2026 – 03/2026

- Funnel Optimisation: Identified a 16.5% page-view-to-cart drop-off as the primary conversion bottleneck across 5,000+ records.
- Revenue Insight: Quantified R88,000 total revenue over 35 days, with an average order value of R106.51 and R17.60 revenue per visitor.
- Traffic Source Analysis: Organic search was the top channel with 2,038 views and 204 purchases, outperforming paid ads and email combined.

E-Commerce Sales Performance Analysis | Excel, Databricks SQL & Power BI 01/2026 – 02/2026

- Data Cleaning: Resolved formatting issues, missing values, and inconsistent dates across a raw e-commerce dataset in Excel before loading into Databricks.
- SQL Analysis: Wrote 7 structured SQL queries covering revenue by category, cancellation rates, and order trends.
- Key Finding: Identified a 15.46% cancellation rate; Books emerged as the top revenue-generating category.

Coffee Orders Sales Analysis | Excel 03/2026 – 04/2026

- Geographic Segmentation: Analysed sales across 3 countries (2019–2022), revealing the US as the dominant market at 78.96% of total revenue.
- Customer Analysis: Ranked Top 5 customers by sales value to support targeted loyalty and retention strategies.
- Interactive Dashboard: Built a dynamic Excel dashboard with slicers for country, loyalty card, roast type, and date for self-service reporting.

EDUCATION

BSc Mathematical Sciences | Sefako Makgatho Health Sciences University, Pretoria 01/2025 – Present

- Relevant courses: Computer Science, Statistics, Applied Mathematics, Mathematics

Data Analytics Bootcamp | Witle Academy

01/2026 – Present

– Courses: Excel, SQL, Python, Power BI, Insight Presentation, Data Modelling

WORK EXPERIENCE

E-Hailing Driver | Bolt & Uber, Pretoria

11/2022 – 02/2025

– Managed daily transport operations, consistently maintaining a high driver rating through professional service and effective communication.

Stock Packer | Sibanyoni Hardware, Kwamhlanga

11/2018 – 01/2020

– Supported daily store operations in a local hardware and building materials retailer.
